Alameda is that hidden gem between the floating cloud of San Francisco and the mercurial beat of Oakland, It has it's very own peculiar island presence.

Seems the appropriate locus point for a group art show that probes the outer limits of everything from time travel to alternate realities beyond the threshold of this universe.

The show will consist and coalesce a mix of visual art, video, painting and mixed media from many bay area artists.

At 8:30- Noh Fyuchur will perform mutant electronics, new works of sound created especially for this event exploring the spacetime theme.

Drift. Reconstitute. Dissolve. Evolve.  
Experience the Alien.  
Glimpse beyond this mundane reality.  
Alternate dimensions are real  
Come experience this one happening  
Right here in Alameda at Studio 23!

Join us on 2nd Friday, April 14th at 7:00pm for Studio 23's latest group art show:

Video Installation by Melissa Merencillo  
Title: let the waves of time and space surround me
